The M.A.K. Halliday Library Functional Linguistics Series

Series Editors: Chenguang Chang, Guowen Huang

This series focuses on studies concerning the theory and application of Systemic Functional Linguistics. It bears the name of Professor M.A.K. Halliday, as he is generally regarded as the founder of this school of linguistic thought. The series covers studies on language and context, functional grammar, semantic variation, discourse analysis, multimodality, register and genre analysis, educational linguistics and other areas.

Systemic Functional Linguistics is a functional model of language inspired by the work of linguists such as Saussure, Hjelmslev, Whorf, and Firth. The theory was initially developed by Professor M.A.K. Halliday and his colleagues in London during the 1960s, and since 1974 it has held an international congress at various continents around the world. It is well-known for its application in a variety of fields, including education, translation, computational linguistics, multimodal studies, and healthcare, and scholars are always exploring new areas of application.

Upcoming Volumes:

Aspects of Language and Learning (M.A.K. Halliday, University of Sydney, Australia)

Understanding Verbal Art: a functional linguistic approach (Jonathan Webster, City University of Hong Kong, HKSAR, China)

Systemic Functional Linguistics: Texts, Tools, and Tradition (David Butt, Macquarie University, Australia)

Grammar West to East: European and Chinese traditions and the making of modern linguistics (Edward McDonald, University of Sydney, Australia)

Writing and Wording in Eurasian Cultures: linguistic, historical, and ideological perspectives (Edward McDonald, University of Sydney, Australia)

Language, linguistics and ideology: the systemic functional perspective (Annabelle Lukin, Macquarie University, Australia)
